## **My Background**

Educator for 23 years (8 as a teacher and 15 as an administrator)

15 years with MYD (Five as an Asst. Principal and Nine as a Principal)

MYD is the only program that benefits children throughout life: Taking responsibility for their choices and knowing that every choice comes with a consequence.

## **MYD Parent Informational Nights**

"I'm not here to talk you into it, and you aren't here to talk me out of it."

It is important that parents have the information

Nice if they agree but not necessary for school-wide implementation.

I offer parent info nights twice a year

It is always poorly attended (about 5-10 parents)

## 2008-2009 Technology Initiative

All certified, certificated, administrative (including Cabinet) staff will produce a QuickTime Movie for instructional purpose.

Optional if it is posted to a website or in iTunes University.

## Make Your Day Student Trainers

At Eagle Ridge we have been using the Students' Teaching New Students Make Your Day for the last seven years.

This model is effective for new students when hearing about the program through peers using their own kid friendly language.

---

---

---

## COMMON MYD Misunderstanding

Started with "Step"

Used my 6th grade student MYD New Student Trainers to make a movie explaining step.

I had the storyboard sequence; they provided the words for the frames.

Enjoy!

7

---

---

---

---

---

---

---

---

*Why the Make Your Day*

*"Step" thing is a good thing!*

*Oh... how I get it together and back to my desk!*

8

---

---

---

---

---

---

---

---

## "How To"

Storyboard the MYD component you want explained from a student point of view.

If you have MYD student trainers, have them work the language to explain the component.

Using a digital camera, film students role playing MYD.

After you have filmed the shots you need, then have a student record narratives for each part.

Using Keynote or Powerpoint, build your movie.

Export to QuickTime Movie.
